-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Iwai et al. (JP2002149527).

As to claims 7-34, Iwai et al. disclose a vehicle dispatch system and method using a wireless network comprising a location database which stores a list of geographical points to which vehicles are dispatchable (See Fig.1,2); a receiver configured to receive a dispatch request from a mobile terminal via the wireless network, wherein the request includes information indicative of a geographical area identified by the wireless network in which the mobile terminal is situated (See Fig.2; and a dispatch location finder configured to determine at least one candidate geographical point, using the location database, based on the geographical area identified by the wireless network and present the at least one candidate geographical point to the mobile terminal via the wireless network in order to have a user of the mobile terminal select one of the at least one candidate geographical point to which the

user wishes a vehicle dispatched (See abstract); Iwai et al. also disclose a vehicle database (See Fig.1) which stores locations of vehicles and the vehicle finder notifies the mobile terminal via the wireless network of a communication address of the at least one dispatchable vehicle which is reachable from the mobile terminal; and also disclose the communication address is a telephone number of a telephone equipped with the at least one dispatchable vehicle See Fig. 2, abstract).

Response to Arguments

Applicant's arguments with respect to claims 7-34 have been considered but are moot in view of the new ground(s) of rejection.
